

wodtke culture at the ISH 2009 –
High Tech – High Light – High Design
- the Environment and Sustainability in Focus

At the ISH 2009, the world's leading trade fair, wodtke is setting new trends with innovative technology and characteristic wodtke design. The focus is on living environments of tomorrow – last but not least from the perspective of comfort and well-being.

The new designs which wodtke is presenting at the ISH 2009 are innovative, subtle and sophisticated – but the focus is always on environmental friendliness and sustainability. Heating appliances are becoming more and more intelligent. wodtke stoves, in addition, not only boast high system compatibility – they also look good.

Once again, wodtke exhibits its skill in implementing visionary ideas. "dadoo," the wood-burning stove with an optional LED package and innovative Comfort Lift-Up; "Tio," the new line of wood-burning stoves featuring a water heat exchanger for connection to central heating systems; "daily," the new wood pellet stove for ambient-air-independent operation and the flagship, "ivo.tec," in trendy "white" are only a few examples of masterful implementation of ideas and joy in design.

Innovation und Design as an entrepreneurial philosophy

With its innovative, design-oriented product philosophy in the pellet stove technology and wood-burning stove sector, wodtke underscores its commitment to forward-looking heating systems for wood and wood pellets. wodtke products stand for exceptional technology and functionality. wodtke pellet stove technology constitutes what is arguably one of the most attractive connections between ecological awareness and economic efficiency.

For wodtke, innovation means advancing technological progress in the product area of pellet and wood-burning stoves: room-air independent fireplaces, wood-burning stoves with integrated water heat exchanger, highly complex firebox geometry for optimizing combustion and increasing efficiency, wodtke thermocontrol, pellet stove technology with options for connection to communication

systems and much more. In Tübingen, solutions are developed which always focus on increasing quality and convenience.

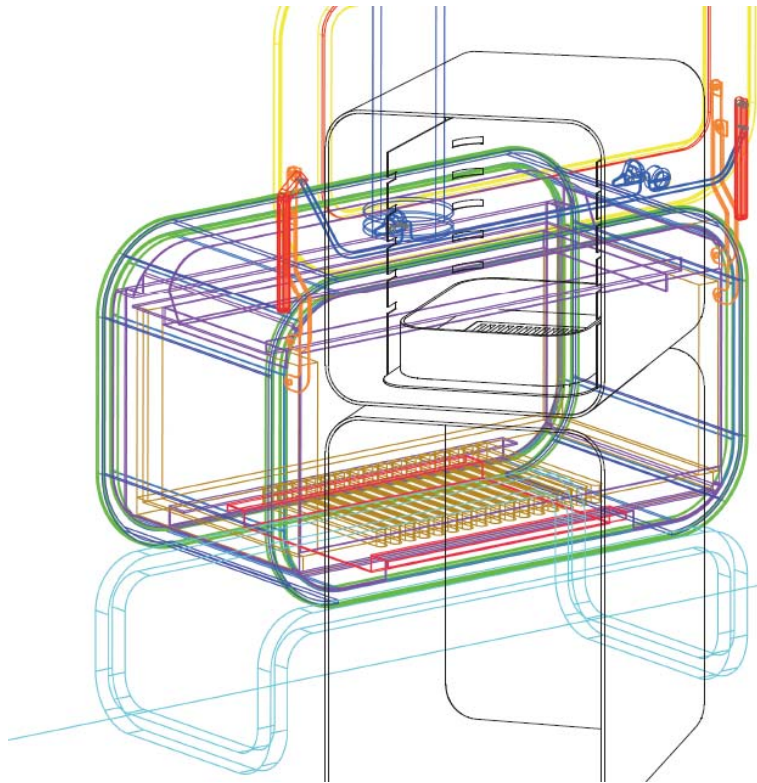

Design is the defining element of the wodtke brand name. wodtke products are unmistakable in terms of design and quality internationally, enjoying a high recognition value. They have been receiving awards from international juries for years. *"This large number of distinctions such as the repeated nomination for the Design Award of the Federal Republic of Germany is another incentive for pursuing new and at times "out-of-the-box" design solutions,"* says managing partner Christiane Wodtke. In taking this avenue the enterprise intends to create lasting values, not merely set trends. *"Considering all the passion which we put into the design of our products it is not surprising that people fall in love with our objects, for they are the expression of diverse emotions",* she explains her credo.

wodtke – the initiator of visionary ideas

Christiane Wodtke has shaped the enterprise's product development from the very start and she embodies its philosophy and design: *"In connection with corresponding key technologies for intelligent building, our products, systems and solutions promote quality of life. People who opt for our products experience a new quality of heating and a new sense of warmth."*

Christiane Wodtke is managing partner of the wodtke GmbH, Tübingen. She has shaped the enterprise's product development from the very start and she embodies its philosophy and design.

From the idea to its implementation: wotke dadoo

Fire in form – with “dadoo”, an exceptional wood-burning stove in every respect, wotke offers a penetrating look into tomorrow's world of wood-burning stoves.

wodtke Water+: TIO, a wood-burning stove by wodtke, not only produces pleasant warmth and a fascinating play of flames; it also directs a large part of the thermal energy it generates to the central heating system and is thus ideally suitable for integration with solar energy.

The hearth returned to the heart of the home: wodtke pellet stove boiler ivo.tec with glass décor "Latte M"
