# feel the flame no. 1

feel the flame no. 1 - the wodtke electric fireplace spreads a cosy ambience and pleasant, comfortable warmth in any living space with the atmospheric flame effect. Emotions and practical benefit fuse into one harmonious, complete work of art.

- 🔥 Electric fireplace, freely suspended with atmospheric flame effect
- 🔥 20 watt power consumption in operation without heating output
- 🔥 1 kW / 2 kW heating output can be switched on via convection air fan
- 🔥 Simple wall mounting
- 🔥 Ready to plug in, one socket is sufficient
- 🔥 Energy-efficient LED technology
- 🔥 Includes remote control
- 🔥 Low noise

wodtke

# Comfortable warmth and design

## **Almost like a log fire**

With the connectable heating output of up to 2 kilowatts, feel the flame no. 1 provides cosy warmth. Particularly in buildings that are furnished with underfloor heating and thus allow no spontaneous increase in room temperature, feel the flame is ideally suited as additional heating.

The applications are almost unlimited, whether in the living area, in the bedroom or even in the bathroom: a single socket is sufficient for installation. Within a few minutes, the electric fireplace can be installed then conveniently controlled remotely. As a result of the energy-efficient LED technology, the energy consumption of feel the flame is very low. In flame mode without heating output, the power consumption is an economical 20 watts.

## **Progressive and timeless**

With high-quality materials, precision workmanship and energy-efficient LED technology, a design object is created for the highest living demands – progressive and timeless.

Design is the fundamental element of the wodtke brand. The aim is to create lasting value and not only to set trends – always with the claim of sustainability.

The warmth and heating of the future require interaction of various energies for a holistic and sustainable heating system.

Electric domestic heating technology will also play an ever greater role in the heating market. In combination with other renewable energy sources, electricity can be used intelligently and flexibly and thus guarantees the sustainability of future systems.

## Details

classic - item no.: 025 100

### feel the flame no. 1 classic

<b>Power consumption without heating output:</b>	20 watts
<b>Heating output level 1:</b>	1000 watts
<b>Heating output level 2:</b>	2000 watts
<b>Mains connection:</b>	1/N/PE ~ 230 V 50 Hz
<b>Dimensions W x H x D :</b>	1200 x 525 x 182 mm
<b>Colours:</b>	black matt, powder-coated
<b>Weight:</b>	38.5 kg

prime black - item no.: 025 110

### feel the flame no. 1 prime

<b>Power consumption without heating output:</b>	20 watts
<b>Heating output level 1:</b>	1000 watts
<b>Heating output level 2:</b>	2000 watts
<b>Mains connection:</b>	1/N/PE ~ 230 V 50 Hz
<b>Dimensions W x H x D :</b>	1200 x 525 x 186 mm
<b>Colours:</b>	black, white, orange / acrylic glass
<b>Weight:</b>	39.9 kg

prime white - item no.: 025 111

prime orange - item no.: 025 112

Enjoy a tour of our product world and experience warmth in its loveliest forms.

If you want to know all that wodtke can offer you in addition to »feel the flame«, e.g. pellet stoves, wood-burning stoves or infrared radiation heater, visit our website, our brand new online shop, or – in person – our Feuerforum® in Tübingen.

We look forward to meeting you.
